

Table of Contents

Symmetry breaking and Knowledge Compilation	1
<i>Andrea Balogh and Barry O’Sullivan</i>	
Extended Abstract: Acquiring Maps of Interrelated Conjectures on Sharp Bounds	10
<i>Nicolas Beldiceanu, Jovial Cheukam Ngouonou, Rémi Douence, Ramiz Gindullin and Claude-Guy Quimper</i>	
Exploiting Model Entropy to Make Branching Decisions in Constraint Programming.....	14
<i>Auguste Burlats and Gilles Pesant</i>	
Solving the Constrained Single-Row Facility Layout Problem with Decision Diagrams (Extended Abstract)	21
<i>Vianney Coppé, Xavier Gillard and Pierre Schaus</i>	
Extended Abstract: Constraint Acquisition Based on Solution Counting	24
<i>Christopher Coulombe and Claude-Guy Quimper</i>	
Automated SAT Problem Feature Extraction using 1 Convolutional Autoencoders	27
<i>Marco Dalla, Andrea Visentin and Barry O’Sullivan</i>	
Extended Abstract: Sequence Variables for Routing Problems	36
<i>Augustin Delecluse, Pierre Schaus and Pascal Van Hentenryck</i>	
Finding Counterfactual Explanations through Constraint Relaxations.....	39
<i>Sharmi Dev Gupta, Begum Genc and Barry O’Sullivan</i>	
Explaining Propagation for Gini and Spread with Variable Mean (Extended Abstract)....	48
<i>Alexander Ek, Andreas Schutt, Peter J. Stuckey and Guido Tack</i>	
Aggressive Bound Descent for Constraint Optimization	51
<i>Thibault Falque, Christophe Lecoutre, Bertrand Mazure and Hugues Watez</i>	
On PB Encodings for Constraint Problems	60
<i>Thibault Falque and Romain Wallon</i>	
A Boolean Formula Seeker in the Context of Acquiring Maps of Interrelated Conjectures on Sharp Bounds.....	69
<i>Ramiz Gindullin, Nicolas Beldiceanu and Jovial Cheukam Ngouonou</i>	
Boolean Functional Synthesis and its Applications.....	74
<i>Priyanka Golia, Subhajit Roy and Kuldeep S. Meel</i>	
Combining Reinforcement Learning and Constraint Programming for Sequence-Generation Tasks with Hard Constraints - Extended Abstract	83
<i>Daphné Lafleur, Sarath Chandar and Gilles Pesant</i>	
Exploiting Functional Constraints in Automatic Dominance Breaking for Constraint Optimization (Extended Abstract)	86
<i>Jimmy H. M. Lee and Allen Z. Zhong</i>	
Large Neighborhood Search for Robust Solutions for Constraint Satisfaction Problems with Ordered Domains	89
<i>Jheisson López, Laura Climent and Alejandro Arbelaez</i>	

Solving the Non-Crossing MAPF for non point-sized robots	92
<i>Xiao Peng, Olivier Simonin and Christine Solnon</i>	
Extended Abstract for : Scheduling the Equipment Maintenance of an Electric Power Transmission Network using Constraint Programming	101
<i>Louis Popovic, Alain Côté, Mohamed Gaha, Franklin Nguewouo and Quentin Cappart</i>	
Improved Sample Complexity Bounds for Branch-and-Cut	104
<i>Siddharth Prasad, Maria-Florina Balcan, Tuomas Sandholm and Ellen Vitercik</i>	
Peel-and-Bound: Generating Stronger Relaxed Bounds with Multivalued Decision Diagrams	106
<i>Isaac Rudich, Quentin Cappart and Louis-Martin Rousseau</i>	
Optimized Code Generation against Power Side Channels	109
<i>Rodothea Myrsini Tsoupidi, Roberto Castañeda Lozano, Elena Troubitsyna and Panagiotis Papadimitratos</i>	
Selecting SAT Encodings for Pseudo-Boolean and Linear Integer Constraints	120
<i>Felix Ulrich-Oltean, Peter Nightingale and James Walker</i>	
CNF Encodings of Binary Constraint Trees (Extended Abstract)	140
<i>Ruiwei Wang and Roland Yap</i>
